

LINANOX 1010

Chemical name:

Tetrakis [methylene-3-(3,5-di-tert-butyl-4-hydroxyphenyl-propionate)] methane

Formula $C_{73}H_{108}O_{12}$

Molecular Weight 1177.6

CAS# 6683-19-8

Specification:

Appearance	White or grains powder
Ash	Max.0.10%
Melting point	110.0-125.0°C
Volatilizing	Max.0.50%
Flash point	297°C
Solubility (20°C)	Acetone 47
	Chloroform 71
	Ethanol 1.5
	Ethylacetate 47
	n-Hexane 0.3
	Methanol 0.9
Methylene chloride	63
Assay, effective components	Min.98.0%

Application: >high molecular weight hindered phenolic antioxidant, very low volatility, food contact.

>Used as an antioxidant and thermostabilizer for polypropylene, polyethylene, impact resistant polystyrene, poly-4-methyl- pentene.

>Can be used as a stabilizer for natural and synthetic rubber, polyvinyl chloride, and copolymers of acrylonitrile with butadiene and styrene, polyacetals, alkyde resins, polyamides, and polyesters.

- >Antioxidant 1010 concentration ranges between 0.1%~0.5% ppm. Extensive performance data of Antioxidant1010 in various organic polymers and applications are available upon request.
- >The effectiveness of the blends of Antioxidant1010 with Antioxidant 168 (see antioxidant B215 or B225 page) or with Antioxidant 168 and Antioxidant FS042(cas 143925-92-2) is particularly noteworthy.

Handling and Safety:

- >FDA approved for use in indirect food contact applications.
- >For additional handling and toxicological information, please consult us for **Maternal Safety Date Sheet**

Package: Packed with plastic bag in composite plastic woven sack, Net 25kg/bag, 1000kg/pallet, 10pallet/20'FCL,or according to customers' requirements.
